

FlightMeter Privacy Policy

Flight-Sheets takes your privacy seriously. Please read the following to learn more about our privacy policy.

What This Privacy Policy Covers

This Privacy Policy covers the treatment of any personally identifiable information that is collected in order to allow you to use the **FlightMeter** application.

This policy does not apply to the practices of companies that Flight-Sheets does not own or control, or to people that Flight-Sheets does not employ or manage.

Information Collection and Use

Geo Location Information

Subject to your approval when you first run the app, **FlightMeter** collects geo location information during flights in order to save your flight track history.

Providing approval for the app to collect your location information is *not* required to use the application – if you do not provide this permission, the app will not be able to save your track history.

Location data is not shared outside of the application, and Flight-Sheets.com does not have access to this information.

If you wish to change the geo location access permission, you can do so in your device's Settings app.

Local Notifications

Subject to your approval when you first run the app, **FlightMeter** will send local notifications to your app. These are primarily used as reminders such things as fuel tank changes or to close your flight plan.

These notifications are sent locally by the application itself, do not originate outside of the app, and do not leave the app.

Your notification settings and permissions can be changed in your device's Settings app.

Information Sharing and Disclosure

Flight-Sheets does not have access to any personally identifiable information, so has no ability to share any such information with third parties.

Changes to this Privacy Policy

This Policy may be edited from time to time. If we make any substantial changes we will notify you by posting a prominent announcement on main web page at www.flight-sheets.com.
